General

Colour	Black
Construction	Stainless Steel

Dimensions

Height	87mm
Length	87mm

Geneva brings the flexibility of Mode systems to the custom integration and European markets. Designed to suit standard UK and European back boxes the Geneva plate has a design tailored to the AV and integration markets in the UK and across Europe.

Clear lines, laser engravable buttons and a variety of standard and custom finishes make Geneva a very popular choice for lighting control.

Buttons can be programmed to recall a scene, toggle a scene ON and OFF, RAISE or LOWER lighting levels, control blinds.

Geneva is just one of a range of keypads and user interfaces available from Mode Lighting which have been designed to offer the user a wide selection of finishes, button styles, layouts and overall styling.

All keypads connect using the M-BUS network and systems can be controlled to allow any button to control any single group or groups of lighting as required.
