

RIGEL
LED DOWNLIGHTS

High-lumen, compact downlights delivering powerful, glare-free lighting that blends effortlessly into any space.

RIGEL LED Downlights

The new Rigel Series is named after one of the brightest stars in the galaxy, reflecting its powerful performance in a remarkably compact form. These miniature downlights deliver impressive brightness from small, discreet fixtures, creating a clean and refined ceiling appearance.

Compact enough to be held easily between two fingers, Rigel Downlights feature a sleek, minimalist design that blends seamlessly into any ceiling. Despite their small size, they offer high lumen output, providing powerful illumination while remaining subtle and almost unnoticeable once installed.

Engineered with a unique anti-glare design and UGR <19 rating, Rigel Downlights emit soft, comfortable light that reduces glare and enhances visual comfort.

Suitable for a wide range of applications, the Rigel Series is ideal for both residential and commercial lighting environments.

RIGEL LED Downlights

Create lighting that works for you

When dealing with low ceilings or obstructions within the ceiling void, you can simply select a lower-profile light engine heat sink to save space. This flexibility allows the entire area to maintain a consistent lighting design while still meeting the required illumination levels.

Cut-off Angle

Visual Comfort with Low Glare Designed with a 36° cut-off angle, the fixture effectively blocks excess light and prevents direct glare into the eyes. It delivers focused yet soft illumination, making it ideal for environments where visual comfort is essential—such as retail displays, reception areas, and residential spaces.

Wall Washing

The Rigel range features purpose-designed inserts for wall-washing applications. Follow the guidelines below when installing Rigel wall-washing downlights to achieve smooth, even, and uniform illumination across the surface.

RIGEL INSTALLATION

1. Cut hole for downlight

2. Screw base to ceiling

3. Insert protective foam

4. Plaster to base lip

5. Remove protective foam

6. Assemble downlight

7. Connect module to LED driver. Connect driver to power using the connector

8. Fit connector and driver through hole and fit light module into frame

9. Downlight complete

RIGEL CCT MODULES

RIGEL DIM TO WARM

Dim to warm lighting becomes softer and warmer as it's dimmed, echoing the glow of traditional incandescent bulbs. This creates a relaxed, inviting atmosphere that feels more natural in the evening and helps reduce glare and visual strain. It enhances warm materials such as wood and brick, adding depth and character to a space.

B Dim to Warm Module

Part	Code	Colour Temp	Lumens	Watt	Current	CRI	Dimmable
	RIGELMOD1 3/2	1800K-3000K	472lm	10W	250mA	90+	Yes

C Dim to Warm Lens

Part	Code	Beam
	RIGELMOD1 LENS35	35°

E LED Driver

Part	Code	Dimming	Watt	Amperage
	RIGEL 10W/TRIAC	Triac	10W	180-350mA
	RIGEL 10W/DALI	Dali	10W	120-350mA
	RIGEL 10W/1-10V	1-10V	10W	120-350mA

RIGEL TUNABLE WHITE

Tunable white lighting allows you to adjust the colour temperature of a space, from cool, crisp daylight tones to warmer, softer whites. This flexibility means you can create focused, energising light during the day and a more relaxed atmosphere in the evening. It offers practical control over mood and functionality, making it ideal for both workspaces and living areas.

B Tunable White Module

Part	Code	Colour Temp	Lumens	Watt	Current	CRI	Dimmable
	RIGELMOD1 27/65K	2700K-6500K	485lm	10W	250mA	90+	Yes

E LED Driver

Part	Code	Dimming	Watt	Amperage
	RIGEL 12W/CCT	Dali	12W	250mA
