Voltage	240V

The **Griffin** is a modern eye catching table/floor lamp. Constructed from aluminium with a brushed finish, this fitting will compliment existing contemporary furnishings such as coffee tables, sofas and tiled/laminate floors if located on the floor. It can tilt on both hinges up to 90°.

The fitting has a circular clear switch with a 1.8m lead. The toughened design allows this to be located on both a table or floor for hand or foot operation. Complete with mains plug and translucent cable to hide the appearance of the wires. A built in electronic transformer allows low voltage lamps to be used. For use with a low voltage AR111 G53 lamp up to 50W maximum (available separately).

NOTE: This product is fitted with a 2-pin European plug which will need to be replaced or used with a travel adaptor.
