

# LED Infrared Floodlights

Steinel Sensor LED Floodlight 240V  
Black 30W

## XLED 10EVO BLK

Black 30W  
Quicklink: Q276E

### General

Colour	Black
Construction	Aluminium
Dimmable	No
IP Rating	IP44
Weight	2.2kg
Detection Angle	240°
Detection Method	Infrared sensor
Detection Range	12m
Dimmable	No
Time Delay	5 secs to 15 mins

### Dimensions

Depth	220mm
Height	205mm
Horizontal Rotation	270°
Vertical Rotation	200°
Width	200mm

### Electrical

Maximum Wattage	30W
Voltage	240V

### Light Characteristics

Colour Temperature	4100K Cool White
Lumens	2000 lm
Lumens Per Watt	67 lm/W

The **Steinel Sensor LED Flood** has 10 bright LEDs and an infra-red sensor making it ideal for lighting driveways and gardens, particularly where operation through motion detection is a requirement. The LEDs give a bright white light, are more energy efficient than equivalent halogen floodlights (approximately equivalent to 100W halogen) and have an extremely long life span. Its robust aluminium casing and IP54 rating make this fitting weather proof and durable. The floodlight can be adjusted about both its horizontal and vertical axis and a reflector can be attached to the motion sensor to direct its range. The duration and brightness of light, along with the ambient light threshold at which the fitting begins to work, are all fully adjustable and there is an override control so that the LEDs can simply be switched on and off.
