Dimensions

Base Diameter	160mm
Length	355mm
Maximum Suspension Length	2660mm

Electrical

Maximum Wattage	40W
Voltage	240V

The **Fucsia** pendant designed by **Achille Castiglioni** is constructed from a hand blown conical glass diffuser with a sandblasted rim.

A subtle injection moulded opaline silicone ring circles the bottom of the light to both protect and finish the turn on the glass.

The bulb holder is made from white powder coated tubular steel.

Fucsia makes a stunning hall light, in rows, or as a table light.
