IP Rating	IP23

Battery Life	3 hrs
Emergency Type	Maintained

#### Dimensions

Depth	115mm
Diameter	425mm

#### Electrical

Maximum Wattage	28W
-----------------	-----

The **SpaceLite** is an energy efficient 28W 2D polycarbonate luminaire. Its attractive design is ideal for internal applications such as staircases, corridors and prestige offices. It can be used as either a wall or ceiling light. This fitting is also available as a standard light without the emergency feature.

Emergency lights are used in commercial buildings as a safety precaution to power outages, so that people will be able to find their way out of a building in the event of an emergency.

**Maintained Emergency Lighting:** The emergency light units are illuminated at all times using the same lamps for both normal and emergency operation. Please note maintained fittings can be wired as non-maintained.

**Non-Maintained Emergency Lighting:** A non maintained fitting is not illuminated until the event of power failure.
