White

The **D-Light** is a unique feature wall light providing an all-directional secondary light source. The three 1W LED's are hidden on the edge of the fitting. The see through design gives the illusion of space, making it an ideal choice for compact thoroughfares or rooms with low ceilings.

Constructed from plastic with a silver finish. This fitting is mains switching only and is not dimmable. A 350mA 3W driver is included for connection to mains supply.
