-----------------	----

The **Bulkhead T5 Emergency** is a maintained, energy efficient 8W T5 polycarbonate luminaire for use on the wall or ceiling. Its attractive design is suitable for interior applications and its weatherproof (IP65) construction means it is also ideal for exposed external applications.

Emergency lights are used in commercial buildings as a safety precaution to power outages, so that people will be able to find their way out of a building in the event of an emergency.

Maintained Emergency Lighting: The emergency light units are illuminated at all times using the same lamps for both normal and emergency operation. Please note maintained fittings can be wired as non-maintained.

Non-Maintained Emergency Lighting: A non maintained fitting is not illuminated until the event of power failure.
