-----------------	----

The **Recessed T5 Emergency** is a maintained, energy efficient 8W T5 polycarbonate luminaire for use on the wall or ceiling. Its attractive design is suitable for interior applications.

Emergency lights are used in commercial buildings as a safety precaution to power outages, so that people will be able to find their way out of a building in the event of an emergency.

Maintained Emergency Lighting: The emergency light units are illuminated at all times using the same lamps for both normal and emergency operation. Please note maintained fittings can be wired as non-maintained.

Non-Maintained Emergency Lighting: A non maintained fitting is not illuminated until the event of power failure.
