The **LED Slimline Emergency Pack 12V 50W 3hr** is used for maintained or non-maintained operation for use with a maximum of 50watt lamps at 6volts for 3hours.

You can use 20W, 35W or 50W 12V halogens. For an LED option we recommend the Real MR16 7W that is linked to this product

Emergency packs are used in commercial buildings as a safety precaution to power outages, so that people will be able to find their way out of a building in the event of an emergency.

Maintained Emergency Lighting: The emergency light units are illuminated at all times using the same lamps for both normal and emergency operation. Please note maintained fittings can be wired as non-maintained.

Non-Maintained Emergency Lighting: A non maintained fitting is not illuminated until the event of power failure.
