The **Tube Range** lights are 240V spotlights used to highlight certain focal points using different wattages, brightness and beam angles.

The fittings are positioned onto track which can be mounted onto practically any surface. This allows you to move and change your light fittings around when you need to, without having to make any long term installations.

The **Tube Range** lights have a pre-wired 12VAC transformer built in to allow MR16 lamps to be retro fitted with ease.
