Dimensions

Height	12mm
Length	1m
Width	15mm

Electrical

Maximum Wattage	12W
Voltage	12V

Light Characteristics

Colour Rendering Index	65
Watts Per Metre	12 W/m

The **LED RGB Bar** is a IR remote controlled colour changing bar. Create stunning visual effects, flashing, strobing, fading, dimming or simply colour changing using our **LED RGB Controller and IR Remote** available separately.

A **LED RGB Driver 36W 12V** is also required to use this product. A maximum of three 1000mm LED RGB Bars can be connected to this driver. A 150mm connecting cable is supplied with the LED RGB Bar to connect additional bars together. Fixing Clips are also supplied simplifying installation.

**Caution:** The warm white produced by RGB products is not the same as the warm white produced by single coloured products. By mixing the colours to create warm white a hint of Red, Green, or Blue may appear.

The best way to display RGB products is on a white surface. When projected onto different coloured surfaces and materials the colours can vary.
