

ETT4

Brass 1 x 25mm² 3 x 16mm² Conductor

Quicklink: Q2FB2

The **Niglon ETT4** is a solid brass earth terminal block designed for heavy-duty main grounding, earthing, and equipotential bonding applications. Featuring a robust 4-way configuration, it is engineered with a high-security twin-screw (double pole) setup per terminal channel utilizing brass cheese-head screws to guarantee an ultra-reliable mechanical and electrical connection.

With cheese head, 4 way brass screws - 1 x 25mm² 3 x 16mm²
