

YRT6.5

M6 Stud (6.5mm)
Quicklink: Q2FC0

General

Colour	Yellow
Construction	Plastic

This pre-insulated yellow ring crimp terminal provides a secure, high-conductivity connection for heavy-duty electrical applications. Designed to accept copper conductors from 4.0mm² to 6.0mm², it features a robust internal metal barrel enclosed in durable, color-coded insulation. Ideal for commercial wiring, earth points, machinery, and high-power termination circuits, it ensures long-term reliability and resistance to vibration when compressed with a standard crimping tool.
