

ET6

Brass 16mm² Conductor
Quicklink: Q2FD4

General

Colour	Brass
Construction	Brass

The Niglon ET6 is a solid brass earth terminal block designed for reliable main grounding, electrical earthing, and equipotential bonding. Featuring a 6-way configuration, this block utilizes a streamlined single-screw (single pole) design per terminal channel with slot-head brass screws to securely lock down grounding wires. It accommodates a maximum conductor capacity of up to 16mm², featuring a multi-sized entry configuration consisting of one 6.5mm main entry hole alongside four 5.5mm entry holes
