General

Colour	White
Construction	Porcelain

The Niglon Porcelain Terminal Connector range provides a specialized, ultra-reliable connection solution engineered specifically for extreme-heat environments. Molded from premium, non-flammable white porcelain housing, these heavy-duty 2-pole blocks boast an exceptional maximum ambient temperature rating of up to 280C. Safely operating at a rated voltage of 450V, they are the ideal trade-standard choice for wiring high-intensity heating elements, commercial ovens, kilns, domestic appliances, and industrial furnace machinery.
