

PDSO POWER END

Grey
Quicklink: Q3008

General

Construction Aluminium

Dimensions

Depth 6mm
Width 12mm

The **Oval Channel Power End** is used in conjunction with the *Oval Channel Extrusions*.

Its purpose is to seal up the starting end of the extrusion, whilst leaving a small hole to allow a cable to be inserted through to the first piece of tapelight. This is to ensure small objects such as dust cannot enter the fitting to interfere with the electrical components inside.

Only 1 power end is required for each circuit of Tapelight. This means that if you buy 2 x 2m of extrusion, you would only need a power end on the final piece.
