Colour	Black
Construction	Plastic
IP Rating	IP67

Dimensions

Cable Length	1m
Diameter	98mm
Height	105mm
Spike Length	221mm

Electrical

Amperage	350mA
Maximum Wattage	3W

Light Characteristics

Beam Angle	45°
------------	-----

The **LED90 Master Kit** contains everything you will need to create colour changing effects in your garden.

A Chameleon Master 350mA 21W pack can operate a maximum of six 3W LED90's. If more 3W LED90's are required a Chameleon Slave pack can be added which can also control a maximum of six 3W LED90's. An unlimited number of 21W Chameleon Slave 350mA 21W packs can be used with a Chameleon Master 350mA 21W pack.

This 350mA 3W colour changing light fitting can be used for illuminating flower beds, statues and small plants. This fitting is rated at IP67 meaning that it can be left outside indefinitely and can be left directly underneath water. This allows the user to colour change their water features without the need of buying a specialist under water fitting.

The spike light is a plug and play fitting. Its leads are connected via male and female plugs which are tightened by a locking ring. The cables are rated as IP55 which means that they are splash proof from all sides but cannot be submerged in water. If you plan to install the fitting under water then the connections on the leads must be left on land.

The fittings have a beam angle of 45°.
