Diameter	98mm
Height	105mm
Spike Length	221mm

Electrical

Amperage	350mA
Maximum Wattage	3W

Light Characteristics

Beam Angle	45°
------------	-----

The **LED9030 Spike Add On** is a 350mA 3W colour changing Spike Light with a 2m Coupler Lead.

A Chameleon Master 350mA 21W pack can operate a maximum of six 3W Spike Lights. If more Spike Lights are required a Chameleon Slave pack can be added which can also control a maximum of six 3W downlights. An unlimited number of 21W Chameleon Slave 350mA 21W packs can be used with a Chameleon Master 350mA 21W pack.

Ideal for illuminating flower beds, statues and small plants. This fitting is rated at IP67 meaning that it can be left outside indefinitely and can be left directly underneath water. This allows the user to colour change their water features without the need of buying extra specialist under water lighting.

This spike light is a plug and play fitting. Its leads are connected via male and female plugs which are tightened by a locking ring. The cables are rated as IP55 which means that they are splash proof from all sides but cannot be submerged in water. If you plan to install the fitting under water then the connections on the leads must be left on land.
