Colour	White
Construction	Steel
Dimmable	Yes
IP Rating	IP20

Dimensions

Cut Out	330 x 330mm (Length x Width)
Depth	104mm
Horizontal Rotation	45°
Length	320mm
Vertical Rotation	45°
Width	320mm

Electrical

Maximum Wattage	300W (4 x 75W)
Voltage	12V

The **Grid Trimless Quadruple AR111** is an adjustable downlighter that can take up to four 75W lamps, which can be angled in any direction.

This product comes with a mounting ring which is designed to be fitted into the ceiling and plastered in before the light fixture is put into place. The downlighter fits into the hole in the ceiling and will rest on top of the mounting bracket. Once the light is fitted there will be no trim unlike the similar *Grid Range* of products.

This version takes four low voltage AR111 G53 75W maximum lamps (available separately). Each lamp has its own terminal, allowing you to wire all lamps to one transformer or for each lamp to have its own transformer. Using a separate transformer for each lamp gives better flexibility as each individual lamp can be dimmed or switched as required.
