## MAXI K ANOD2M

Anodised Aluminium 2000mm

Quicklink: Q323B

### General

Colour	Aluminium
Construction	Aluminium

### Dimensions

Depth	12mm
Length	2m
Minimum Depth	12mm
Width	22mm

The Maxi Recessed Extrusion Profile comes in 1m or 2m lengths and is used to house LED tape. It is compact lightweight and easy to install. For mounting into grooves (milled in different types of furniture boards).

### Key Features

- Extrusion can fit slim design and thin furniture pieces
- Recessed housing for LED strips up to 0.39" / 10mm wide
- Masking the channel edge
- Designed to reach an IP67 waterproof rating

### Parts Required

#### Extrusions

As many lengths of extrusion can be used as is desired. Any 1m or 2m piece can be positioned end to end with each other to make an unlimited distance.

#### Endcap

An Endcap is required for each circuit of extrusions being used. It is positioned on the end of the very last extrusion in the circuit and is used to stop dust from and moisture from interfering with the electrical components.

#### Powerend

An Powerend is required for each circuit of extrusions being used. It is positioned on the very first extrusion in the circuit and serves the same purpose as the Endcap. The powerend has a hole in the centre which allows a cable to be fed through to power the strips.

#### Diffuser

A diffuser is used to give the light a more even blend. Simply purchase the same amount of diffusers as you did with extrusions.

Will fit any tape with a maximum width of 10mm.

This extrusion has been anodized.
