-----------------	-----

The **Slim Square 2D Emergency 240V** is an energy efficient 28W 2D aluminium and glass luminaire. Its attractive design is ideal for internal applications such as staircases, corridors and prestige offices. It is also IP44 rated so it can be used in bathroom zone 2. This fitting is also available as a standard light without the emergency feature.

Emergency lights are used in commercial buildings as a safety precaution to power outages, so that people will be able to find their way out of a building in the event of an emergency.

Maintained Emergency Lighting: The emergency light units are illuminated at all times using the same lamps for both normal and emergency operation. Please note maintained fittings can be wired as non-maintained.

Non-Maintained Emergency Lighting: A non maintained fitting is not illuminated until the event of power failure.
