WISE CONVERTER 7

6-30V Input | 700mA Output

Quicklink: Q32D0

General

Colour	Black
Construction	Plastic
Dimmable	No

Dimensions

Height	22mm
Length	21mm
Width	41mm

Electrical

Amperage	700mA
Maximum Wattage	15W

The **Wise Converter 3** is a power supply that is used to drive 700mA LEDs, but only requires an input of anything between 6 to 30V. This makes it ideal for use on boats, cars, caravans, or motorbikes where the supply is limited to low voltage, or for powering direct from a battery. Perfect for running 700mA LED lights from an existing 12V or 24V power supply

Any wattage 700mA LED can be used, but cannot exceed a maximum of 8 units wired in series.

This product is rated IP68 so is suitable for use in wet and humid environments. Includes thermic and short circuit protection.
