-----------------	---------------

The **Large Rectangular Plaster LED** is a stylish LED maintained emergency fitting. It has a linear contemporary design and is suitable for paint finishes, allowing you to blend the fitting with the overall scheme of the room.

Its attractive design is ideal for internal applications such as staircases, corridors and prestige offices. This fitting is also available as a standard light without the emergency feature.

Emergency lights are used in commercial buildings as a safety precaution to power outages, so that people will be able to find their way out of a building in the event of an emergency.

Maintained Emergency Lighting: The emergency light units are illuminated at all times using the same lamps for both normal and emergency operation. Please note maintained fittings can be wired as non-maintained.

Non-Maintained Emergency Lighting: A non maintained fitting is not illuminated until the event of power failure.

This emergency fitting complies with BS 5266-1.
