Dimmable	Yes

Dimmable Yes

Dimensions

Cut Out	193mm (Diameter)
Depth	162mm
Diameter	190mm

Electrical

Voltage	240V
---------	------

The **Oval Plaster Invisible** is a hidden wall recessed spotlight used for indirect lighting. Its ideally used to highlight walkways such as corridors, paths and stairs.

Important

Once installed, the Oval Plaster **MUST** be plastered over to completely hide the fitting.

The Invisible range has been **designed to be overpainted in Situ** in the ceiling if necessary. The fitting is painted RAL9010 - 30% Gloss level which has a slightly matt surface, to which the emulsion or other paints will adhere to. The finish from the factory is good enough for normal use and will blend in with the most common ceiling finishes. The slightly matt finish on the product will allow it to be carefully repainted to suit any other ceiling colours.
