The **Extrusion T5** extrusion is constructed from high strength plaster. It is used for indirect recessed lighting. LED strips or T5 fluorescent tubes can be used with this extrusion. This extrusion is made up of a left ended, right ended and middle section, and can be modified in size with additional middle sections, see size guide below for more information.

Please note: Diffuser comes in standard 1500mm strip, and may be required to be cut to required size.
