Beam Angle	150°
------------	------

The LED Panel RGB range features the latest in LED technology. The panels are suitable for commercial and domestic applications, and are designed to fit directly into existing standard suspended ceilings and recesses, or can be suspended (fixings available separately). These panels are ideally suited for office lighting and for meeting rooms and corridors.

Please note: 40cm power cord is included. To extend a 2m, 5m or 10m coupler is required. A 24V driver is required to power this product.

Maximum 8 panels per Wise Receiver.
