Plate Depth	3mm
Width	80mm

The **Wise Mouse Switch** is a wireless switch with daylight sensor.

Wireless switches can be used to control any of the receivers in the Wise Controls range. The function of the switch, and each of its buttons, depends upon the function of the wireless receiver it is programmed to. Therefore a single button can be used for a variety of functions including, but not restricted to, on/off, dimming or master off only.
