The Reality LED Light Engine Module is an LED lamp that matches halogen light source. This is achieved with the use of a single Cree LED chip with a reflector built around it. The result is truly warm and gives that arc of light we are all used to seeing with halogen.

The Reality LED 10W Module is equivalent to a 100W GU10 halogen lamp and, like a halogen lamp, is dimmable. It lasts for 25,000 hours and consumes just 10W.

Key Features

- Replicates halogen reflector
- LED positioned further back for anti glare
- Complies with October 2010 Part L regulations
- Fully dimmable with leading edge dimmers
- Equivalent to 100W GU10
- Lifetime of 25,000
- Fits 50mm Downlight
- Emergency option available

Please Note: This LED lamp comes with a one year warranty as standard.
