The **Trimless Downlight** is a fully adjustable downlight that is available in round or square, black or white. Using the different lampholders available you can select different light sources; Halogen, LED and Metal Halide. It is designed to be plastered into ceilings to give a **seamless** appearance. One of the advantages is that the downlight can be installed then plastered and painted. The **Reality GU10 LED 7W** is an LED lamp that matches a halogen lamp in terms of light source and aesthetics. This is achieved with the use of a single Cree LED chip with a reflector built around it. The result is truly warm and gives that arc of light we are all used to seeing with halogen.

The GU10 Reality Lamp is equivalent to a 75W GU10 halogen lamp and, like a halogen lamp, is dimmable.
