-----------------	-----

Move the Fuse garden light round the garden as you like. In the fruit tree? The flowerbed? On the patio? It is all up to you. With Fuse you get a lighting fixture that unites raw design with high user-friendliness. The shade of the fixture is inspired by classic galvanised milk jugs, which fit well in any type of architecture thanks to their simple expression. The Fuse small garden light can be hung outdoors using the included hook accessory, or place on a hard surface when used with the stand accessory.
