The **Rock 'n' Roll LED GU10 Reality** adjustable downlight has an integrated black baffle that recesses the light source to eliminate glare. It comes complete with a **7W LED Reality Lamp**.

Its inner and middle ring tilt through 35° and rotate through 350° respectively. A combination that allows you full control over the direction of the light source.

When fitted the outer ring is permanently attached to the ceiling while the two inner rings, which form one unit, can easily be pulled out to reveal the lampholder. This makes lamp replacement effortlessly simple.

The **Reality GU10 LED 7W** is an LED lamp that matches a halogen lamp in terms of light source and aesthetics. This is achieved with the use of a single Cree LED chip with a reflector built around it. The result is truly warm and gives that arc of light we are all used to seeing with halogen.

The GU10 Reality Lamp is equivalent to a 75W GU10 halogen lamp and, like a halogen lamp, is dimmable.
