The **Trimless Downlight** is a fully adjustable downlight that is available in round or square, black or white. Using the different lampholders available you can select different light sources; Halogen, LED and Metal Halide. It is designed to be plastered into ceilings to give a **seamless** appearance. One of the advantages is that the downlight can be installed then plastered and painted. The **Reality LED Module** is an LED lamp that matches halogen light source. This is achieved with the use of a single Cree LED chip with a reflector built around it. The result is truly warm and gives that arc of light we are all used to seeing with halogen.

The Reality LED 10W Module is equivalent to a 100W GU10 halogen lamp and, like a halogen lamp, is dimmable.

Key Features

- Replicates halogen reflector
- LED positioned further back for anti glare
- Complies with October 2010 Part L regulations
- Fully dimmable with leading edge dimmers
- Equivalent to 100W GU10
- Fits 50mm Downlight
- Emergency option available
