Dimensions

Cut Out	51mm (Diameter)
Diameter	70mm
Minimum Ceiling Depth	78mm
Vertical Rotation	40°

Electrical

Maximum Wattage	4W
Voltage	240V

The **Invisible Adjustable Pinhole Round** is an adjustable downlight specially designed to accompany the GU11 Reality 4W LED. It has an unobtrusive one millimetre plate that sits practically flush to the ceiling when fitted and contains a baffle that recesses the lamp to reduce glare.

The baffle is also hinged to allow the light source to be directed through a 40 degree arc from the vertical. The Fixed Pinhole is a fixed downlight with a very small aperture creating a dramatic vertical beam lighting effect ideally suited for lighting objects directly underneath it.

The Invisible range has been **designed to be overpainted in Situ** in the ceiling if necessary. The fitting is painted RAL9010 - 30% Gloss level which has a slightly matt surface, to which the emulsion or other paints will adhere to. The finish from the factory is good enough for normal use and will blend in with the most common ceiling finishes. The slightly matt finish on the product will allow it to be carefully repainted to suit any other ceiling colours.
