Construction	Die-cast Aluminium
Dimmable	Yes
IP Rating	IP00

Dimensions

Head Length	210mm
Head Width	170mm

Electrical

Maximum Wattage	120W
Voltage	240V

The **PAR38 3 Circuit Theatre Track** lights are 240V spotlights used to highlight certain focal points using different wattages, brightness, beam angles, filters and coloured gels.

The fittings are positioned onto track which can be mounted onto practically any surface. This allows you to move and change your light fittings around when you need to, without having to make any long term installations.

Three circuit track lighting is a versatile and flexible lighting system commonly used in commercial and residential spaces. The singularity of this lighting track system is that each of the three circuits can be wired and controlled independently, allowing you to have different lighting configurations in the same space. This means you can have multiple sets of lights on the same track, each set with its own switch or dimmer control.
