

Wireless Keyfobs

Wise Mio Keyfob Remote
2 Channel Aluminium / Black

WISEMIO2 ALU/BLK

2 Channel Aluminium / Black
Quicklink: Q4211

General

Colour Aluminium,Black
Construction Aluminium / Plastic
IP Rating IP20

Operating Temperature -10°C ~ +55°C

Dimensions

Depth 10mm
Height 60mm
Width 30mm

Electrical

Power Supply 3V Lithium Battery
CR2032
Voltage 3V

The **Wise Mio Keyfob Remote** operate in the same way as the wall mountable wireless **WiseStyle Switches** but in a hand held key ring attachable form.

The 2 and 4 button remotes can be programmed to any of the channels on the **Wise** receivers, with the possibility of adding up to 32 switches. This means there is no need for two way wiring as you can just add another radio switch and place it where you like.

You could keep one with your car keys and as you drive up to your house, you can switch on your garden lights and hall lights.

You can program the 1 button remote to switch more than one **Wise** receiver. So for example, if you had three receivers it is possible with the 1 button switch to control a circuit from each of the receivers. There is no limit on how many **Wise** receivers are programmed to the same remote.

The battery life lasts up to 2 years.
