The LED PAR38 External Lamp is designed as a direct retrofit replacement for halogen external PAR38 lamps. It has a comparable light output and beam spread to its incandescent and halogen equivalents (120W) but is up to 87% more energy efficient and has a far greater life span. The LED technology used in this lamp give it the comparable benefits of being entirely mercury free, producing little or no heat and having no ultraviolet or infra-red light in its output.

This LED Par 38 Lamp is suitable for outdoor use when with a Ip rated outdoor fixture.
