Colour Temperature	3000K Warm White
Lumens	325 lm
Lumens Per Watt	43 lm/W

The **Kelvin LED** is a designer LED desk lamp. The head is constructed of aluminium, the diffuser in polycarbonate, and base in pressofused zamak. The head is adjustable. The on/off switch is touch-sensitive and the lamp comes with a sensor known as green mode which monitors the level of natural light within the room and adjusts the lamps output accordingly. The lamp would be perfect for a study desk or bedside table and is also available with a clamp or wall-mount fixings.
