| Voltage         | 24V |

### Light Characteristics

|            |     |
|------------|-----|
| Beam Angle | 10° |
|------------|-----|

The **LED7021 Architectural Outdoor Projector** is an outdoor IP68 rated LED colour change floodlight capable of lighting up whole trees or buildings. It has 15 LEDs (5 Green, 5 Blue, 5 Red) and when used in conjunction with the Wise Chameleon pack can mix the colours together to make a scrolling spectrum of 1000 colours. Please select the correct Chameleon Outdoor Box depending on the number of fittings and therefore wattage that needs to be supported. The fitting has a flat base allowing it to be attached onto walls, fences or any other solid surface. It is available in either a 10° or 45° beam. A one button switch can also be purchased instead of the one button switch if you don't require as many functions and only want to cycle through each colour.
