Voltage	240V

The **Flat Plate Primed White** finish is designed to be painted to help the plate merge with the interior colour scheme.

Ideally suited to walls using flat colour or paint effects, special finishes, polishes or specialist paints. Produced with square corners, it features **trimless inserts** for exceptional product reliability.

The superior quality of the **Horizon faceplate style** has been designed to suit both traditional and contemporary interiors. Produced with square corners, it features **trimless switches** for exceptional product reliability. To ensure design uniformity throughout a project, non-standard accessories can be made to suit requirements.

Architrave switches are narrow switches commonly used in areas where space is restricted. They are specifically designed to blend with architraves, and they are often installed between two door frames or near corners or obstacles where a standard switch simply wouldn't fit due to their slim design. A discreet, space-saving solution for controlling lighting and other electrical devices near door frames.

The V-PRO dimmer module comes set in trailing edge mode as standard.

**Please note:** this product must be used with our 1715 backbox.
