

Dimmable LED Driver 1W-25W (Constant Current)  
25W 300mA-900mA

25W 300mA-900mA  
Quicklink: Q44D3

The **DCMulti 1W-25W** is a multi current power supply that can be dimmed from a regular dimmer. The DCMulti has no minimum load on the load side. There is no need to meet the minimum load when connecting most dimmers.

The DCMulti is powered by a 240V input, which means that only 2 wires are required in order to be able to dim the LED circuit. A series of dip switches gives the user the option to change the output to any of the following settings.

Available Amperages- 300,350,500,550,650,700,850,900

Wattage	Secondary	Loading (LEDs/pcs)
15W	300mA	2 - 16
17.5W	350mA	2 - 16
25W	500mA	2 - 16
24.8W	550mA	2 - 15
24.7W	650mA	2 - 12
24.5W	700mA	2 - 11
25.5W	850mA	2 - 10
25.2W	900mA	2 - 9

Colour	White
Construction	Plastic
Dimmable	Yes

Maximum 1 Watt	1 - 25
LED's	
Wiring	Series

Height	20mm
Length	155mm
Maximum LED to Driver Length	10m
Width	54mm

Amperage	350mA, 500mA, 550mA, 700mA, 750mA
Maximum Wattage	25W
Transformer	Electronic
