The Reality LED Light Engine Module Short 25mm is an LED lamp that matches halogen light source. This is achieved with the use of a single Cree LED chip with a reflector built around it. The result is truly warm and gives that arc of light we are all used to seeing with halogen.

The Reality LED 7W Module is equivalent to a 75W GU10 halogen lamp and, like a halogen lamp, is dimmable. It lasts for 25,000 hours and consumes just 7W.
