Emergency Type Maintained

Electrical

Maximum Wattage 5W

The **Blob Downlight LED Emergency Pack** is a maintained, fireproof emergency pack compatible with the Blob downlight (switched) range.

Emergency packs are used in commercial buildings as a safety precaution during a power outage, so that people will be able to find their way out of a building in the event of an emergency.

Maintained Emergency Lighting: The emergency light units are illuminated at all times using the same lamps for both normal and emergency operation. Please note maintained fittings can be wired as non-maintained.

Non-Maintained Emergency Lighting: A non maintained fitting is not illuminated until the event of power failure.
