General

Colour	White
Construction	Aluminium
Dimmable	No

Emergency Type	Maintained
----------------	------------

Dimensions

Cut Out	130mm (Diameter)
Diameter	148mm
Minimum Ceiling Depth	117mm

Electrical

Maximum Wattage	8W
Voltage	240V

Light Characteristics

Beam Angle	90°
Colour Temperature	3000K Warm White

The **Frisbee 8W** is a high powered SMD5630 8W LED downlight with a silver inner ring and transparent panel. A LED driver is incorporated into the fitting, simply wire to mains.

The **Frisbee** range of fittings are light weight simplifying installation. The transparent panel creates a soft uniform light, ideal for commercial applications. This fitting is not dimmable.

This kit includes the **Frisbee Downlight LED Emergency Pack** which is a maintained, fireproof emergency pack compatible with the Frisbee Downlight range.

Emergency packs are used in commercial buildings as a safety precaution during a power outage, so that people will be able to find their way out of a building in the event of an emergency.

This is a maintained emergency pack.

Maintained Emergency Lighting: The emergency light units are illuminated at all times using the same lamps for both normal and emergency operation. Please note maintained fittings can be wired as non-maintained.

Non-Maintained Emergency Lighting: A non-maintained fitting is not illuminated until the event of power failure.
