The Rock 'n' Roll LED & Driver is a fully adjustable downlight complete with a **7W LED Module and Dimmable Driver**.

Its inner and middle ring tilt through 35° and rotate through 350° respectively. A combination that allows you full control over the direction of the light source.

When fitted the outer ring is permanently attached to the ceiling while the two inner rings, which form one unit, can easily be pulled out to reveal the lampholder. This makes lamp replacement effortlessly simple.

The **Reality LED Module** is an LED lamp that matches halogen light source. This is achieved with the use of a single Cree LED chip with a reflector built around it. The result is truly warm and gives that arc of light we are all used to seeing with halogen.

The Reality LED 7W Module is equivalent to a 75W GU10 halogen lamp and, like a halogen lamp, is dimmable.
