Tami LED Extrusion Profile - Cabinet and Cove

Tami LED Tape Extrusion Profile

Anodised Aluminium 2000mm

TAMI ANOD 2.0M

Anodised Aluminium 2000mm
Quicklink: Q4850

General

Colour	Aluminium
Construction	Aluminium

Dimensions

Height	7mm
Length	2m
Minimum Ceiling Depth	6.5mm
Width	16mm

The **Tami Extrusion Profile** with LED Tape is mostly used as interior lighting, especially to light cabinets, stairs, glass-cases, or as niche decorative lighting.

The extrusion is made from high quality, double-anodized aluminum, designed for flexible LED Tape.

LED Tape can be hidden behind a special diffuser cover made of polypropylene.

Standard polypropylene end caps are used for the extrusion as supplementary accessories. End caps protect the extrusion from dust and other undesirable elements, which can make LED strips dirty and consequently deteriorate the lighting parameters.

The extrusion can be mounted to surfaces with the use of double sided adhesive tape or mounting brackets. The mounting bracket guarantees easy and secure mounting of the extrusion to a desired surface. It can also work as connector between two extrusions.
