

TAPE500 CN-012

RGB White 200mm
Quicklink: Q485D

General

Construction Plastic

Dimensions

Length 200mm
Width 15.5mm

The **LED RGB White Tape coupler** is a 20mm plug and play cable which fits perfectly through the hole of the extrusion power end, connecting to the tapelight.

These solderless connectors are to be used when the TAPE500 RGBW tapelight has been cut down, and where the plug in power cords and couplers cannot be used. The connectors have a width of 15.5mm so if to be used with extrusions, ensure that you check that the internal dimensions of the extrusion being used allows for this.
