LED RGBW Tape Coupler  
RGB White 200mm

---

## TAPE500 CN-012

RGB White 200mm  
Quicklink: Q485D

---

### General

Construction      Plastic

### Dimensions

Length              200mm  
Width               15.5mm

The **LED RGB White Tape coupler** is a 20mm plug and play cable which fits perfectly through the hole of the extrusion power end, connecting to the tapelight.

These solderless connectors are to be used when the TAPE500 RGBW tapelight has been cut down, and where the plug in power cords and couplers cannot be used. The connectors have a width of 15.5mm so if to be used with extrusions, ensure that you check that the internal dimensions of the extrusion being used allows for this.
