

## TAPE500 CN-C12

RGB White 200mm  
Quicklink: Q485E

### General

Construction Plastic

### Dimensions

Length 200mm  
Width 15.5mm

The **LED RGB White Tape coupler / power cord** is a 200mm plug and play cable which fits perfectly through the hole of the extrusion power end, connecting to the tapelight.

These solderless connectors are to be used when the TAPE500 RGBW tapelight has been cut down, and where the plug in power cords and couplers cannot be used. The connectors have a width of 15.5mm so if to be used with extrusions, ensure that you check that the internal dimensions of the extrusion being used allows for this.
