

LED Tape Accessories

LED RGBW Tape Coupler End
RGB White

TAPE500 CN-D12

RGB White
Quicklink: Q485F

General

Construction Plastic

Dimensions

Height 4.75mm
Length 15.5mm
Width 15.5mm

The **LED RGB White Tape coupler end** is a 20mm plug and play cable which fits perfectly through the hole of the extrusion power end, connecting to the tapelight.

These solderless connectors are to be used when the TAPE500 RGBW tapelight has been cut down, and where the plug in power cords and couplers cannot be used. The connectors have a width of 15.5mm so if to be used with extrusions, ensure that you check that the internal dimensions of the extrusion being used allows for this.
